# Automotive Parts Manufacturing

## About this Directory

The nearly 140 company listings in this directory are provided as a broad, representative sample of Texas companies in the Texas automotive parts manufacturing industry. This directory is not a comprehensive source of all automotive parts manufacturers in the state. Due to resource and space limitations, the Office of the Governor Economic Development and Tourism division is unable to include all relevant firms in this document.

The highlighted companies are large companies and those with significant state employment.
